January 28, 2020

SA-12820A

Written by B. Engler

REASON: Lock Down Bar is off-center when lock is engaged.

PARTS NEEDED: Lock Down Bar Spacer (pair). Available through your Distributor.

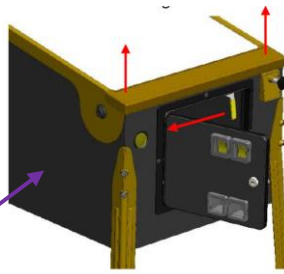

TOOLS NEEDED: Rubbing Alcohol.

P/N PLS0096-00
Lock Down Bar Spacers

INSTRUCTIONS:

1. Turn Off power and unplug unit from AC source.
2. Open coin door.

3. Remove lock down bar.
4. With the Lock Down Bar on a firm stable surface, Install 1 spacer on either side of the Lock Down Bar by removing the backing on the tape and firmly pressing spacer into the Lock Down Bar. Remember to have the curved side match the curve of the Lock Down Bar. Clean the area under the spacers with rubbing alcohol. Remove any black foam tape that might be in the way of installing the spacer, also any residual glue from the foam tape should be removed with rubbing alcohol and left to dry before spacers are installed.

5. Install Lock Down Bar and fully engage the lock. Lock Down Bar should be centered on the cabinet.
6. Close the coin door.
7. Plug the unit in and power up the game.
8. Test the game for as long as needed.
